

Now everyone can create their own website!

With ThunderSite, you don't need to be an expert in HTML & web design to create professional looking websites quickly and easily. ThunderSite® automates all the time-consuming programming and design procedures to guide you through the stages of creating and publishing your own website. ThunderSite® has more than 160 exceptional graphic themes. Thousands more top quality graphic themes are also available and can be downloaded at www.thundersite.com.

PERFORMANCE AND EASY TO USE

ThunderSite® is suitable for both beginners and experts, allowing anyone to create a professional-looking website in record time. ThunderSite® saves you time in the process of creating a complex company website or a personal web page and gives you the possibility of modifying its appearance at any time with a simple click.

You don't need to use graphic tools; ThunderSite® does all the work for you! ThunderSite® comes with a sample site that allows you to familiarize yourself with its different functionalities. ThunderSite is based on WYSIWYG page editing (What You See Is What You Get): the way your website looks as you work on it is how it will look when it is published on the web, which is similar to how you use a classic word processor.

THOUSANDS OF GRAPHIC THEMES READY TO USE

Several thousand graphic themes (site styles) can be downloaded at ThunderSite.com, allowing you to change the look of your website as often as you like!

INTEROPERABILITY WITH MOST APPLICATIONS

ThunderSite® allows you to work with all existing internet file formats (pictures, movies, sounds, Flash Animations, MS Office documents, PDF documents, etc.) • You can use your favorite HTML editor to change your page source code • Unicode support allows you to compose multilingual pages • Full compatibility with MS Internet Explorer and Netscape Communicator guaranteed.

MAIN FUNCTIONALITIES:

- Ergonomic and visual editing environment for the rapid creation of internet/intranet sites.
- Automatic generation of HTML and JavaScript code and the navigation structure.
- Graphic themes customized.
- Real time preview of your work.
- Effective website structure management: Drag&Drop, Cut&Paste...
